

**Located on the campus of
Cal State - Bakersfield**

The Core Repository was founded in the mid-1970s to preserve Superior Oil's collection of core samples

**The Superior samples are
primarily from wildcat
wells drilled from the
1920s to the 1950s**

**To date, samples from over
6000 wells have been
curated and are available
for examination**

**The CWSR now has nearly
150 file cabinets
filled with well files**

**Chevron's donation of
4000 boxes of well
files has been a valuable
addition to the collection**

**Well files are
organized
by T-R-Sec**

**Unocal's collection of over
12,000 paleo reports
is now available at
the CWSR**

The CWSR also
has an extensive
collection
of Munger scout info
& IWR data
